

OPERA II Recruitment

in conjunction with...

...it's the winning combination

by Cambridge Recruitment Software Solutions

Our unique approach to back office solutions means that Opera II Recruitment is the only solution that combines payroll, billing and financial accounting all within a single software application.

You wouldn't try to run your front office solution using multiple pieces of software so why try to do it with your back office solution?

Our unique approach to back office solutions puts Opera II Recruitment head and shoulders above the competition, even before you start processing your first transaction.

Ten reasons why you should be using Opera II Recruitment

- the only complete back office solution available to the recruitment industry that combines payroll, billing and financial accounting within a single software application
- designed to handle complex reporting structures found in multi office, multi division recruitment businesses
- highly flexible, configurable and tailorable to your specific recruitment needs
- fully HMRC & Working Time Regulation compliant
- recommended by and fully integrates with First Choice Software's RDB ProNet front office software
- 'plug-in' integration option with online timesheets
- stress tested to 12,000 timesheets per week; the ultimate in recruitment automation
- designed by Chartered Accountants in the recruitment industry
- based on the award winning Opera II SME accounting package by Pegasus Software
- developed and supported by a Pegasus Premier Partner & Developer with over 140 clients

Don't take our word for it, see what our customers say.....

The combination of RDB ProNet & Opera II Recruitment has allowed us to double the size of our business without increasing our back office staff - Colin Way, FD

Together RDB ProNet & Opera II Recruitment have provided the management information and control required to expand over the last two years - Ian Walters, Director

With RDB ProNet & Opera II Recruitment we have replaced our legacy back office systems with cutting edge technology allowing our business to efficiently scale as our business grows - Mylene Curtis, MD
