April 2008

To Whom it may concern,

Cambridge Recruitment Software Solutions Ltd

In order to achieve our growth objectives we needed better management information and control over our business. This was unachievable with our previous outsourced service providers; the only solution was to bring our back office systems in house.

We commissioned Cambridge Recruitment Software Solutions to provide us with a fully integrated front to back office recruitment solution. The solution they provided linked our front office recruitment database with online timesheets and 'Opera II Recruitment'. Cambridge Recruitment Software Solutions project managed the entire process. They dealt directly with our existing suppliers and kept us regularly informed of progress.

Since our new system went live in December 2006 we have never looked back. 'Opera II Recruitment' provides us with up to date management information enabling us to manage our business more effectively, allowing us to see exactly from which clients and which consultants our business is being generated.

This improved management information has helped us grow our business over the last year. As a result we have recently opened up a new Peterborough office with multiple divisions and new consultants; needless to say our systems coped seamlessly.

I would not hesitate in thoroughly recommending Cambridge Recruitment Software Solutions to any recruitment business looking for an efficient back office solution capable of taking their business forward to the next level.

Yours Sincerely,

Ian Walters
Managing Director
